Hytrel® HTR8808 BK316

THERMOPLASTIC POLYESTER ELASTOMER

Common features of Hytrel® thermoplastic polyester elastomer include mechanical and physical properties such as exceptional toughness and resilience, high resistance to creep, impact and flex fatigue, flexibility at low temperatures and good retention of properties at elevated temperatures. In addition, it resists many industrial chemicals, oils and solvents. Special grades include heat stabilised, flame retardant, food contact compliant, blow molding and extrusion grades. Concentrates offered include black pigments, UV protection additives, heat stabilisers, and flame retardants.
Hytrel® thermoplastic polyester elastomer is plasticiser free.

The good melt stability of Hytrel® thermoplastic polyester elastomer normally enables the recycling of properly handled production waste. If recycling is not possible, we recommend, as the preferred option, incineration with energy recovery (-24 kJ/g of base polymer) in appropriately equipped installations.
For disposal, local regulations have to be observed.

Hytrel® thermoplastic polyester elastomer typically is used in demanding applications in the automotive, fluid power, electrical/electronic, consumer goods, appliance and power tool, sporting goods, furniture, industrial and off-road transportation/equipment industry.

Hytrel® HTR8808 BK316 is a high viscosity thermoplastic polyester elastomer designed for blow molding. It has very good mechanical properties at elevated temperatures and excellent resistance to most automotive fluids.

Product information

Resin Identification	TPC-ET-I	ISO 1043
Part Marking Code	>TPC-ET-I<	ISO 11469

Rheological properties

Melt mass-flow rate	4	g/10min	ISO 1133
Melt mass-flow rate, Temperature	240	°C	
Melt mass-flow rate, Load	10	kg	
Intrinsic viscosity	1.1		ISO 307, 1628
Moulding shrinkage, parallel	2.4[1]	%	ISO 294-4, 2577
Moulding shrinkage, normal	2.2[2]	%	ISO 294-4, 2577

Blow Molding

Drying Recommended	yes	
Drying Temperature	70 - 80	°C
Drying Time, Dehumidified Dryer	6 - 8	h
Processing Moisture Content	≤0.03	%
Melt Temperature Optimum	235	°C
Melt Temperature Range	230 - 240	°C
Swell ratio	1.7	
Mold Temperature Optimum	50	°C
Mold Temperature Range	30 - 70	°C

Characteristics

Processing	Blow Moulding
Delivery form	Pellets
Special characteristics	Light stabilised or stable to light, Heat stabilised or stable to heat

Acids

- ✔ Acetic Acid (5% by mass), 23°C

Symbols used:

- ✔ possibly resistant
  Defined as: Supplier has sufficient indication that contact with chemical can be potentially accepted under the intended use conditions and expected service life. Criteria for assessment have to be indicated (e.g. surface aspect, volume change, property change).
- ✘ not recommended - see explanation
  Defined as: Not recommended for general use. However, short-term exposure under certain restricted conditions could be acceptable (e.g. fast cleaning with thorough rinsing, spills, wiping, vapor exposure).
